

QUALITY, ENVIRONMENT AND OCCUPATIONAL RISK PREVENTION POLICY

The current circumstances of society demand that companies provide higher quality in their products and services, as well as greater protection of the environment and greater protection of our workers.

The senior management of WILOC TECHNOLOGIES SL. is aware of this responsibility, and in its process of continuous improvement and prevention of pollution and damage and deterioration of health, as well as the performance of OSH, it establishes a Comprehensive Management System based on the ISO 9001:2015, ISO 14001:2015 and ISO 45001:2023 standards for its design, development, implementation and operation of IIOT (Internet of Things in the Industrial Environment) projects.

The organization is committed to ensuring an adequate and acceptable level of safety at work for its workers without compromising their health as a result of that work.

In addition, this policy establishes a framework to ensure the establishment and revision of quality, environmental management and occupational health and safety objectives and goals.

To achieve these purposes, the senior management of WILOC TECHNOLOGIES SL. establishes the following commitments:

- Comply with the established legislation in terms of quality, environmental, and occupational health and safety, in addition to other requirements that the Company may voluntarily subscribe to with its customers.
- Total customer satisfaction. That all the staff of WILOC TECHNOLOGIES SL. has the particular objective of obtaining customer satisfaction, assuming their responsibilities and carrying out their duties using appropriate environmental practices.
- Creation and maintenance of communication channels with stakeholders, to understand their requirements and expectations and to be able to move towards their satisfaction.
- Preventive activity will be aimed at avoiding risks and evaluating those that have not been eliminated.
- Continuous training of personnel to improve training, as well as to comply with the strict legislation that applies to us.
- Before entrusting a worker with a task, his or her professional capacity in terms of safety and health will be considered in order to be able to carry it out.
- The choice of equipment and methods of work and production shall be made with a view in particular to reducing monotonous and repetitive work and to reducing its effects on the health of workers.
- Prevention and minimization in the generation of waste.
- Ensure that our services are delivered while protecting the environment and, where possible, help customers do the same.
- Guarantee an analysis and monitoring of the relevant processes, establishing the relevant improvements in each case, based on the results obtained and the established objectives

The policy WILOC TECHNOLOGIES SL. it is in continuous evolution with the company, so it is reviewed for its continuous adaptation, remains exposed in a visible place for all personnel and is communicated, so that it is understood at all levels of the organization.
